Akure, Nigeria (WAT, UTC+1) · Remote · Open to remote roles

Summary

Software engineer who ships end to end across **backend, mobile, and desktop**: FastAPI and Node.js services, Flutter apps live on the App Store and Play Store, and PySide6/SwiftUI desktop software used by universities and academies. Self-taught from Python in 2018/2019; professional since 2023, working remotely with teams in Nigeria, Spain, and the USA. Early member of a young software company, where I own backend and lead mobile across client projects.

Technical Skills

- **Languages:** Python, TypeScript, JavaScript, Dart, Kotlin, Swift, SQL, C# · *Familiar (hands-on experimentation):* C, C++, OCaml
- **Backend:** FastAPI, Django, Flask, Node.js, Express, NestJS, ASP.NET · REST, WebSockets, microservices, multi-tenant systems
- **Mobile:** Flutter (Android & iOS; primary), BLoC / GetX, Socket.IO, Firebase Cloud Messaging, Kotlin, Swift, React Native
- **Desktop:** PySide6 / Qt, SwiftUI, PyInstaller, Inno Setup (Windows & macOS)
- **Data:** PostgreSQL, MongoDB, MySQL, Redis
- **DevOps & Security:** Docker, GitHub Actions, AWS, Linux, Nginx, PM2 · JWT, OAuth2, RBAC
- **Testing:** Pytest, Jest, Postman, unit and integration testing

Experience

All engagements are remote and held concurrently.

Mobile & Backend Engineer (Contract) · Jorly · Remote · *May 2026 – Present*

- Building the Jorly travel-booking platform end to end: Flutter app and FastAPI backend with Paystack/Flutterwave payments, Redis, and Celery. In development.

Senior Mobile & Backend Engineer · Jodna Technologies · Port Harcourt, Nigeria (Remote) · *Dec 2024 – Present*

- Early member of a young software company delivering client projects; started by owning all backend work, then took over mobile development alongside it.
- Led mobile development of three production **Flutter** apps (Vaultify, Sentinel, Tywn) through App Store and Play Store release; cut load times by ~40% through UI refactoring and API optimization.
- Architected shared real-time and push infrastructure (Socket.IO, FCM) and led backend design on **FastAPI and Node.js** (authentication, RBAC, analytics).
- Mentored junior engineers and introduced clean architecture practices.

Desktop Software Engineer · DINATEN · Santa Cruz de Tenerife, Spain (Remote) · *Aug 2023 – Present*

- Develop and maintain **piXeval** and **pixEBAP**, exam-correction desktop apps used by academic institutions, built with **PySide6**, packaged with PyInstaller and Inno Setup, plus a native **macOS version in SwiftUI**.
- Automated scanning and grading (OCR/OMR with OpenCV2 and TensorFlow) of up to **30 exams per minute**; bulk import from Word, Excel, and Moodle; email delivery of results.
- Localized into Catalan, Spanish, English, Euskera, and French.

- Sole developer of the ground-up **rebuild of piXeval** (in progress): a Qt-free Python engine, a FastAPI HTTP/WebSocket backend, a React + TypeScript UI, and Qt WebEngine / pywebview desktop shells (40k+ lines of Python, 79 test files). Exams, documents, exports, and CAT3 answer-sheet generation (PDF, barcodes, print runs) are done, including a modular rewrite of the sheet-generation scripts supplied by DINATEN's owner.

Freelance Software Developer · Remote · *2020 – Present*

- Delivered backend APIs, automation scripts, and data-processing tools for clients in Nigeria and internationally.

Mobile Engineer (Contract) · Zent Technologies Limited · Lagos, Nigeria (Remote) · *Mar 2025 – Jul 2025*

- Developed the Zent mobile app in Flutter (Android and iOS), integrating real-time order tracking, inventory management, and payment workflows.

Backend & Mobile Engineer · Sofgo · Ondo, Nigeria (Remote) · *Sep 2023 – Sep 2024*

- Built REST APIs (Django, Node.js) for logistics and e-commerce platforms, with payment gateways and authentication.
- Built and maintained production Flutter apps for Android and iOS alongside the backend team.

Selected Projects

- **Vaultify** — Flutter estate-management app: Paystack wallet and bill payments, QR access codes, and real-time resident–security chat (Socket.IO).
- **Tywn** (formerly TrackWeNg) — Flutter safety app: live location sharing, group chat, one-tap emergency alerts, background geolocation, and a home-screen widget.
- **Sentinel** — Flutter access-management app: QR visitor check-in/out, scoped sub-profiles, real-time announcements.
- **OxyTrack** (HealthPort Africa) — Flutter app tracking medical oxygen cylinders through their full lifecycle with QR and NFC identification and audit workflows.
- **Jorly** *(in development)* — Travel booking platform: Flutter app plus FastAPI backend (flights, hotels, cars; Paystack and Flutterwave payments; Redis and Celery).
- **PriceGrid** *(personal)* — FastAPI, PostgreSQL, Redis: decoupled pub/sub spike alerts, cached reads, RBAC, unit and integration tests.
- **SnapGrade** *(personal)* — PySide6 + OpenCV app that generates, scans, and grades multiple-choice sheets via OMR.

Education, Recognition & Certifications

- **B.Eng. Electrical & Electronics Engineering**, Federal University of Technology, Akure — 2024
- **Outstanding Technical Contribution**, TrackWeNg (now Tywn) — Certificate of Recognition, Dec 2025
- **Python Developer Certification**, freeCodeCamp — Jul 2026 (verify)
- **Publication:** *Blast Design Using Artificial Neural Network Approach and Langefors-Kihlstrom Bench Blast Model* (read)
- **Languages:** English (fluent, C1), Spanish (conversational, B1)
