Miracle Apata — Software Engineer

GitHub • LinkedIn • Email

Summary

Software Engineer with experience building **backend systems, mobile platforms, and cross-platform desktop applications**. Skilled in designing scalable APIs, real-time systems, and production software used by educational institutions, fintech platforms, and mobile services. Experienced with **Python, TypeScript, Node.js, Flutter, and Swift**, with strong knowledge of distributed systems, authentication, and cloud deployment.

Proven ability to design full software platforms end-to-end, from backend infrastructure to client applications across **web, mobile, and desktop environments**.

Technical Skills

- Languages: Python, TypeScript, JavaScript, Dart, Swift, SQL, C#
- Backend & APIs: FastAPI, Django, Flask, Node.js, Express, NestJS, ASP.NET
- Mobile Development: Flutter (Android), REST API integration
- Desktop Development: Python (PySide6 / Qt), SwiftUI, Cross-platform Windows/macOS development
- Databases: PostgreSQL, MongoDB, MySQL, Redis
- DevOps & Infrastructure: Docker, GitHub Actions, AWS, Linux, Nginx, PM2, Docker Compose
- Architecture: REST APIs, Microservices, WebSockets, Multi-tenant systems, Serverless
- Authentication & Security: JWT, OAuth2, Session Authentication, RBAC
- Testing: Pytest, Jest, Postman, Unit & Integration Testing

Work Experience

Software Engineer

Jodna Technologies — Port Harcourt, Nigeria
https://jodnatechnologies.com
Dec 2024 – Present

- Led backend architecture for mobile and web platforms using **FastAPI and Node.js**.
- Designed scalable APIs supporting authentication, role-based access control, and analytics.
- Implemented **real-time notifications**, push messaging, and event-driven backend services.
- Integrated cloud storage, payment systems, and monitoring tools.
- Mentored junior developers and improved backend engineering standards.

Backend Engineer (Contract)

ScanifyDev — New Jersey, USA
https://scanifydev.com
Sep 2024 – Dec 2024

- Developed backend APIs using **Python (FastAPI)** and **Node.js (Express)**.
- Built systems supporting **blockchain-integrated financial approvals and smart deals**.
- Designed scalable database schemas and automated CI/CD pipelines.
- Implemented authentication, financial workflows, and secure API integrations.

Backend Engineer (Internship)

Sofgo — Ondo, Nigeria
https://sofgo.io
Sep 2023 – Sep 2024

- Developed REST APIs for **logistics and e-commerce platforms** using **Django and Node.js**.
- Implemented payment gateways, authentication systems, and backend services.
- Collaborated closely with mobile engineers to ensure seamless API integration.

Desktop Software Engineer

DINATEN — Santa Cruz de Tenerife, Spain
https://dinaten.com
Aug 2023 – Present

- Developed and maintained **piXeval** and **pixEBAP**, desktop applications used by academic institutions for automated exam correction and evaluation.
- Built cross-platform applications using **Python (PySide6 / Qt)**.
- Packaged production builds using **PyInstaller** and distributed installers with **Inno Setup**.
- Built and maintained a **macOS native version** of piXeval using **SwiftUI**.
- Implemented features including:
  - Automated exam scanning and grading (up to **30 exams per minute**)
  - Bulk import from Word, Excel, and Moodle
  - Randomized exam model generation
  - Email delivery of student results
  - Advanced statistical performance analysis
- Localized the application into **Catalan, Spanish, English, Euskera, and French**.

Projects

Token Realty Exchange – Decentralized Real Estate Commodities Platform
Tech: FastAPI, PostgreSQL, TypeScript, LoopBack, MongoDB, AWS
https://tokenrealty.exchange

- Built backend infrastructure for a decentralized platform enabling tokenization of real estate equity.
- Implemented **multi-role authentication and financial approval workflows**.
- Designed KYC/AML verification pipelines and asset token creation APIs.
- Integrated smart contract systems and DAO oversight logic.

Tywn (formerly TrackWeNg) – Real-Time Safety & Social Location-Sharing App
Tech: Flutter, Socket.IO, Google Maps, Firebase Cloud Messaging
https://home.twynapp.org/

- Developed a Flutter mobile app for **real-time location sharing** with trusted contacts, group ("Cliques") chat, and one-tap emergency alerts.
- Implemented background geolocation tracking and a home-screen widget for quick emergency triggers.
- Integrated push notifications and Socket.IO-based real-time messaging.

Sentinel – Smart Community Access Management App
Tech: Flutter, Socket.IO, Firebase Cloud Messaging, QR Code Scanning
https://sentinelsoftware.live

- Developed a Flutter mobile app for **digital visitor registration and QR-based check-in/check-out** used by estates, offices, and schools.
- Built **sub-profile management**, letting residents grant scoped access permissions to dependents.
- Integrated real-time announcements, broadcasts, and activity logs via Socket.IO, plus Firebase Cloud Messaging push notifications.

Vaultify – Smart Estate Management App
Tech: Flutter, GetX, Socket.IO, Paystack, Firebase Cloud Messaging
https://vaultify.africa

- Developed a Flutter mobile app letting estate residents **pay dues, generate visitor access codes, and send one-tap emergency alerts** to estate security.
- Integrated **Paystack** for wallet top-ups and bill payments (airtime, data, cable, electricity).
- Built real-time chat between residents and estate security using Socket.IO.

Gamaliel Consult – Mentorship & Advisory Platform
Tech: Node.js, Express, MongoDB, TypeScript
https://www.gamalielconsult.com

- Developed REST APIs for a mentorship and consultancy platform.
- Implemented appointment scheduling, mentor matching, and role-based access control.

PDF Webpage – Academic Material Sharing Platform
Tech: Node.js, MongoDB
https://pdf-webpage-ashy.vercel.app

- Built backend services for a student document sharing platform.
- Implemented PDF uploads, course categorization, and notification systems.

Education

B.Eng. in Electrical & Electronics Engineering
Federal University of Technology, Akure — Graduated 2024

Languages

- English (Fluent, C1)
- Spanish (Conversational, B1)
