Miracle Apata — Mobile Engineer

GitHub • LinkedIn • Email • Portfolio • +234 816 852 4477
Akure, Nigeria (WAT, UTC+1) · Remote · Open to remote roles

Summary

Senior mobile engineer building production **Flutter** apps (plus Kotlin, Swift, and React Native when a project calls for it) for estate management, safety, fintech, and health-tech, with three apps live on the App Store and Play Store. Strong on clean architecture, real-time features (Socket.IO, push), payments, and QR/NFC hardware integration. Started on backend and moved into leading mobile, so I work comfortably with API and server teams. Remote, collaborating with designers, backend engineers, and product stakeholders.

Technical Skills

- **Languages:** Dart, Kotlin, Swift, JavaScript, TypeScript
- **Mobile:** Flutter (primary), React Native, Android SDK, iOS SDK
- **Architecture:** Clean Architecture, BLoC / Hydrated BLoC, GetX, MVVM, MVC, modular per-feature structure
- **Integration:** REST APIs, GraphQL, Socket.IO, Firebase Cloud Messaging, Paystack, Flutterwave, Google Maps, NFC, QR/barcode scanning
- **Data:** SQLite, PostgreSQL, MongoDB, Firebase Realtime DB, Cloud Firestore
- **Quality & CI/CD:** Unit and integration testing, performance optimization, Git, GitHub Actions
- **Concepts:** Push notifications, background services, real-time sync, mobile security, secure storage

Experience

All engagements are remote and held concurrently.

Senior Mobile Engineer · Jodna Technologies · Port Harcourt, Nigeria (Remote) · *Dec 2024 – Present*

- Early member of a young software company delivering client projects; started on backend, then moved into leading mobile development.
- Led **three production Flutter apps** — Vaultify, Sentinel, and Tywn — from architecture through App Store/Play Store release.
- Reduced load times by **~40%** through UI refactoring and optimized API interactions.
- Architected shared **real-time and push-notification infrastructure** (Socket.IO, FCM) reused across the team's apps for chat, alerts, and status sync.
- Mentored junior engineers and introduced **clean architecture practices**.

Mobile Engineer (Contract) · Zent Technologies Limited · Lagos, Nigeria (Remote) · *Mar 2025 – Jul 2025*

- Developed and maintained the Zent app in Flutter (Android and iOS) with animated, responsive UI built from design prototypes.
- Integrated services for real-time order tracking, inventory, and payment workflows; improved responsiveness by optimizing state management and API request handling. Play Store

Mobile Engineer · Sofgo · Ondo, Nigeria (Remote) · *Sep 2023 – Sep 2024*

- Built and maintained production Flutter apps for Android and iOS across multiple client projects, with modular codebases and integration tests.

Featured Apps

Vaultify — Smart estate management (App Store)

- Wallet, bill payments (airtime, data, cable, electricity), and service charges via Paystack; QR virtual IDs and access codes verified at the gate.
- Real-time resident–security chat (Socket.IO) and FCM push notifications; leading a refactor from legacy controllers to per-feature repositories.
- *Flutter, GetX, Socket.IO, Paystack, FCM, Secure Storage*

Tywn (formerly TrackWeNg) — Real-time safety and location sharing (App Store · Play Store)

- Continuous background geolocation with battery-optimized services and a home-screen widget; one-tap emergency alerts that broadcast live location.
- "Cliques" group chat over Socket.IO; privacy-focused permission handling including iOS App Tracking Transparency.
- *Flutter, BLoC / Hydrated BLoC, Socket.IO, Google Maps, FCM*

Sentinel — Access management for estates, offices, and schools (App Store)

- Digital visitor registration with multi-step check-in/out, QR/barcode verification, and scoped sub-profiles for dependents.
- Real-time announcements, broadcasts, and activity logs across resident and security roles.
- *Flutter, BLoC / Hydrated BLoC, Socket.IO, FCM*

OxyTrack — Oxygen cylinder inventory for HealthPort Africa

- Full cylinder lifecycle tracking (fill, dispatch, inspection, audit) with QR and NFC identification and role-based facility modules.
- BLoC + Hydrated BLoC, Dio networking, secure token storage, clean domain/module separation.
- *Flutter, BLoC, Dio, NFC, QR, Secure Storage*

Education, Recognition & Certifications

- **B.Eng. Electrical & Electronics Engineering**, Federal University of Technology, Akure — 2024
- **Outstanding Technical Contribution**, TrackWeNg (now Tywn) — Certificate of Recognition, Dec 2025
- **Languages:** English (fluent, C1), Spanish (conversational, B1)
