🧾 Miracle Apata – Developer Resume Collection

This repository contains curated, role-specific resumes written in Markdown format. Each resume highlights a unique specialization in my software development journey.

📂 Available Resumes

Role	Filename	Description
📱 Mobile Engineer	resumes/mobile-engineer.md	Flutter-based cross-platform mobile development
🛠️ Backend Engineer	resumes/backend-engineer.md	FastAPI, ASP.NET, and Node.js/TypeScript backend systems
🐍 Python Developer	resumes/python-engineer.md	Python across backend APIs (FastAPI/Django) and PySide6 desktop apps
🖥️ Desktop Developer	resumes/desktop-engineer.md	PySide6 and SwiftUI-based apps for Windows and macOS
💻 Software Engineer	resumes/software-engineer.md	Full-stack and systems development with cross-platform expertise

Each resume is also available as a PDF in `pdfs/`, regenerated from the Markdown via `generate_pdfs.py`.

🏆 Recognition & Certifications

Figure 1: Certificate of Recognition — Outstanding Technical Contribution, TrackWeNg, December 2025

Certificate of Recognition — Outstanding Technical Contribution, awarded by TrackWeNg (December 2025) for contributions to building the platform now known as Tywn.

Figure 2: freeCodeCamp Python Developer Certification, July 2026

Python Developer Certification — freeCodeCamp, July 2026 (~300 hours).

🔎 Usage

- Clone or browse the repo to view resumes per role under `resumes/`.
- Copy or fork to reuse the Markdown templates for your own portfolio.
- Click on individual `.md` files to view each resume directly in GitHub, or grab the matching PDF from `pdfs/`.
- To regenerate the PDFs after editing a resume: `python3 generate_pdfs.py` (requires `pandoc` and `typst`, e.g. `brew install pandoc typst`).
